

## ANANTARA SEMINYAK BALI ENVIRONMENTAL & SOCIAL SUSTAINABILITY POLICY

A luxurious outpost on the island's most sought after stretch of shore, Anantara Seminyak Bali is always seeking to reinforce our commitment to environmental and cultural conservation and sustainability in our adherence to the requirements of the Green Globe standards.

### Water Conservation

We minimise our water consumption in all areas of the resort, with the combined efforts of guests and associates, through the implementation of numerous actions; utilising sink aerators as well as low-flow showers and toilets, using less water when cleaning suites and our kitchen equipment, as well as turning water off whilst brushing teeth (every drop counts).

### Energy Conservation

We reduce energy consumption by at least 10% annually in line with the Anantara Group requirements and our local expectations as a result of energy saving related investments; buying the most energy efficient equipment available, placing energy efficient lighting around the resort, turning off all unnecessary lights as well as computers and other electronic appliances when not being used, and using air conditioners efficiently.

### Waste Management

We combat pollution by reducing, reusing and recycling solid waste which impacts landfills by cooperating with a local waste management vendor. This supports our new direction for recycling waste, as does our composting programme, purchasing durability and reparability/recycling of products.

### Health and Safety

We maintain the health and safety of our guests and associates alike by identifying and monitoring all potential risks and hazards on regular basis and by implementing improved practices when risks are identified, as well as creating awareness through specific training programmes and related campaigns.

### Quality

We ensure the hotel's sustainability performance and commitment to continual improvement by measuring our guests' satisfaction based on corporate standards, setting a high priority on the development and training of our associates, nurturing excellence amongst us, and creating regular property maintenance plans.

### Social-Culture

We work in partnership with the local community as a part of our social involvement programme by offering opportunities for local artisans to utilise our gift shop/library to sell their handicrafts, inviting them to perform Balinese traditional dances and other entertainment shows in the resort, as well as creating awareness to our guests about the local culture and integrating aspects into their everyday experience. Special consideration is also given to employing and empowering local employees, and whenever possible environmentally sustainable products and services are sourced locally.

Anantara Seminyak Bali will continue to comply with all relevant regulations and continue to meet international best practices. Our Green Globe Committee ensures the implementation of an environmental and social sustainability programme by monitoring processes and progress, as well as inviting and encouraging our guests, suppliers and the local community to participate in our efforts to achieve sustainability.
